Project Management Professional (PMP®)

PMP® is a suitable credential for Project Managers/Project Engineers/Civil Engineers or whoever is having direct or indirect interest in Project Management. PMP is offered by PMI® (Project Management Institute) USA. PMP® credentials enable professionals to understand PM standards, tools & techniques, and procedures.

The Project Management Professional (PMP)® is the most important industry-recognized credential for project management professionals to do projects in a structured way. Passing Project Management Professional (PMP)® is a chance to prove one's education, experience, and knowledge in project management.

You can find Project Management Professional (PMP)® certification holders leading projects in nearly every country and, unlike other certifications that focus on a particular geography or domain, the Project Management Professional (PMP)® is truly global. As a Project Management Professional (PMP)®, you can work in virtually any industry, with any methodology, and in any location. Industry leaders believe that Project Management Professional (PMP)® holders can improve project performance

Project Management Body of Knowledge (PMBOK) 7th Edition

PMBOK 7th edition is principle-based on standard rather than process-based standard. The guide has been developed based on a value-based delivery system and project delivery principles. The PMBOK® guide provides a framework for applying the standard and instead of focusing solely on deliverables of projects, focus on project outcomes. It reflects the full range of development approaches (predictive, traditional, adaptive, agile, hybrid, etc.)

Agile Project Management Methodology

Agile project management methodology focuses on delivering value to the customer iteratively, incrementally, continuously, and early. PMP certification holders will have enough knowledge to use agile tools like scrum, Kanban, DSDM, XP, and FDD

PMP® Course Learning Objectives:

At the end of this training, the Participants will get in-depth knowledge in the Project Management domains of Business, People, and Process

- To provide a thorough understanding of the Project Management methodologies.
- To gauge the participant's current level of understanding of the projects and project management.
- To equip the Participants with the necessary exam preparation.
- To effectively and efficiently handle projects.
- To help Participants prepare efficient documents like; Business Cases, Project Charters, Project Management Plans, and other subsidiary plans.
- To understand the contributions the Project Managers, make during the life of a project.
- To enhance and increase avenues in the field of Project Management.
